

**URGENT LIFE-RISK AND EVIDENCE-PRESERVATION NOTICE — ROME
STATUTE ARTICLE 7 / GENOCIDE CONVENTION ARTICLE II(c) REVIEW —
DOCUMENTARY NOTICE TO FEDERAL CHANCELLERY / ANGELA MERKEL
AND GERMAN PARLIAMENTARY ACTORS — ISMAIL RUSTAM**

To:

The United Nations High Commissioner for Human Rights;

United Nations human rights mechanisms, including mechanisms concerning torture, arbitrary detention, enforced disappearance, disability rights and the right to life;

International and regional human-rights organisations;

European human-rights institutions and organisations;

Parliaments, embassies, diplomatic missions and competent state authorities worldwide;

International media organisations, journalists and public-interest investigators;

All institutions, organisations and persons who may receive, read, preserve or forward this material.

**Subject: URGENT LIFE-RISK AND EVIDENCE-PRESERVATION NOTICE UNDER THE ROME
STATUTE, GENOCIDE CONVENTION, ICCPR, CAT, CRPD AND ECHR — SUBMISSION OF
NEW REPORTS 7, 8, 9 AND 10, AS WELL AS PDFs 07, 08 AND 009**

Dear Sir or Madam,

I respectfully submit the attached AI-assisted legal-documentary reports for urgent preservation, independent review and international protection. These reports are not court judgments; they organise the documentary record, file numbers, official letters, parliamentary references, medical and court records, police/prosecutorial references and witness statements concerning my case in Germany.

In this present submission, I am providing newly researched OpenAI/ChatGPT-assisted legal analyses based on official documents, including Reports 7, 8, 9 and 10, as well as PDFs 07, 08 and 009. I have previously submitted Reports 1, 2, 3, 4, 5 and 6, as well as 01, 02, 03, 04, 05, 06 and 001, 002, 003, 004, 005, 006, 007 and 008. I also inform you that my documentation website, www.rustemazeri.com, is still not yet fully operational, and I am doing everything within my power to overcome this obstacle and make the evidence archive accessible.

The attached materials describe a long-term chain in which I state that I arrived in Germany as a healthy person and was progressively disabled through detention, medical and social obstruction, homelessness, court and cost decisions, denial of compensation, pension and relocation possibility, dependency and lack of effective protection. Report No. 7 frames this as alleged deliberate disablement followed by denial of compensation, pension, relocation, medical-social restoration and effective protection.

The reports also show that political and parliamentary actors were documentarily informed, including the Federal Chancellery / Angela Merkel, Berlin political leadership, DIE LINKE, SPD/CDU-related authorities, Bündnis 90/Die Grünen, Claudia Roth and Green Bundestag structures. Report No. 9 records that the issue was not a normal refrigerator, welfare or pension matter, but a chain involving detention, police violence, medical/social denial, severe illness, disability, HIV/AIDS, court-error allegations, Betreuung, a EUR 91,456 burden, blocked bank account and the request to leave Germany or obtain protection in another democratic country. Report No. 8 records Green Party / parliamentary exposure, including Bundestag petition references Pet 3-16-41-8254-022925 and Pet 3-17-11-217-018680.

Report No. 009 requests that the 2004–2012 period be examined as a cumulative social-law, housing, health-insurance, dental, disability, rent and court-access chain. The documentary record describes Charité warnings, inhuman housing conditions, lawyer correspondence, loss of work capacity, lack of subsistence and health insurance, and a pattern in which institutions shifted responsibility from one office to another while the real harm remained unresolved.

The 2019–2026 materials require urgent attention. They concern suspected cancer/Kaposi-sarcoma and hospital/AOK insurance problems, questions whether treatment and insurance protection were actually secured, theft/loss of evidence devices including iPhone 5 and iPhone 13 Pro, continuing dental

destruction and loss of chewing/nutrition function, assaults, police/prosecutorial non-protection, metro-ticket/enforcement/detention pressure despite severe disability, and a continuing housing/survival crisis. I still have not been able to properly investigate whether the 2019 cancer/Kaposi suspicion spread, stopped or was treated, because each new crisis forced me away from the previous unresolved matter.

I request examination under the strongest relevant international legal standards, including but not limited to:

Rome Statute Article 7(1)(b) and Article 7(2)(b) — extermination through the intentional infliction of conditions of life calculated to destroy part of a civilian population, including deprivation of access to medicine, social survival, shelter and essential means of life;

Rome Statute Article 7(1)(k) — other inhumane acts intentionally causing great suffering or serious injury to body or to mental or physical health;

Genocide Convention Article II(c), together with Rome Statute Article 6(c) — deliberately inflicting conditions of life calculated to bring about physical destruction, if the required protected-group intent can be established;

ICCPR Articles 6, 7, 9, 14, 17 and 26;

UN Convention against Torture, including the duty to investigate serious ill-treatment and to prevent cruel, inhuman or degrading treatment;

CRPD, especially where disability, medical abandonment, denial of equal protection, denial of access to justice and disability-based dependency are involved;

ECHR Articles 2, 3, 5, 6, 8, 13, 14 and 18.

The attached reports expressly request that the documented chain be examined not as isolated social, medical, police, court, housing or welfare disputes, but as a cumulative life-destroying pattern potentially engaging crimes-against-humanity indicators, torture or inhuman/degrading treatment, disability-based abandonment, denial of effective remedy, discrimination, and the deliberate creation or toleration of conditions of life incompatible with human dignity and survival.

I do not want to remain trapped in Germany. For many years I have requested a safe possibility to leave and live elsewhere, but I state that my disability, dependency on German welfare, health-insurance limitations, blocked finances/bank accounts, denial of compensation, pension and damages, and continuous new crises have made this practically impossible. Report No. 08 records my request that, if safe housing, medical protection, legal protection and physical security cannot be ensured inside Germany, external protection or relocation outside Germany should be examined.

I therefore request urgent preservation of all court files, medical files, hospital records, AOK/insurance records, police and prosecutor files, parliamentary files, NGO/internal institutional files, CD/DVD evidence, e-mail/device records, postal/fax records, CCTV/body-camera/emergency-call records and website/domain/hosting evidence. I also request an independent international investigation into whether the cumulative pattern amounts to state-created or state-tolerated life-destroying conditions.

I do not accuse the German people as a nation. My complaint concerns state-linked, political, judicial, police, medical, administrative and institutional structures and specific responsible actors. I also state clearly that I have no intention to commit suicide. If any harm, disappearance, sudden death or alleged "suicide" is attributed to me, I request that it not be accepted without independent international investigation.

Respectfully,

Ismail Rustam / Rustem Ismail
